THE POWER, REP RANGE, SHOCK MASS BUILDING SYSTEM

Createspace, United States, 2013. Paperback. Book Condition: New. 246 x 173 mm. Language: English . Brand New Book. However, as more time goes by, this one dimensional system will bring about progressively diminishing returns as far as hypertrophy is concerned, and along with it, increasing frustration. This situation may lead some towards dangerous anabolic steroids, others to add far too much volume to their workouts (thinking they are not doing enough), and a few to quit training altogether. Most people focus only on training the Type II muscle fibers because they have the greatest potential for hypertrophy. However, to reach the outer boundaries of our genetic limit, we need to train every single fiber along the continuum, from the slowest of the slow, to the fastest of the fast. In addition, we...
