A GREEN CHEMISTRY APPROACH - MICROWAVE ASSISTED ORGANIC SYNTHESIS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Recent advances in microwave-assisted combinatorial chemistry include high-speed solid-phase and polymer supported organic synthesis, rapid parallel synthesis of compound libraries, and library generation by automated sequential microwave irradiation. In addition, new instrumentation for high-throughput microwave-assisted synthesis continues to be developed at a steady pace. The impressive speed combined with the unmatched control over reaction parameters justifies the growing interest in this application of microwave heating. The rapid parallel synthesis of combinatorial libraries..
