## MOLECULAR INVESTIGATION OF EFFECTS OF ANTIOXIDANTS ON BRAIN TISSUE

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | An FTIR Spectroscopic Study | Nowadays, there is an unfortunate increase in exposure to free radicals due to many environmental, lifestyle, and pathological situations. The brain is especially susceptible to free radical attack since it is rich in polyunsaturated fatty acids and consumes very high amounts of oxygen. In the current study, the effects of melatonin, lipoic acid and Vitamin E on rat brain tissue were investigated via Fourier Transform Infrared spectroscopy to understand their interactions with biological molecules. It...
