Excerpt from Memorandum on Currency, 1913 1921 The main tables which follow this introduction constitute, therefore, an attempt to set out in the briefest possible form the most important currency statistics which were available for the period from 1913 up to the end of 1921. These tables supplement the statistics given in the currency pamphlet submitted to the Inter national Financial Conference at Brussels, not only by bringing those statistics more up to date, but also by supplying the data for the years 1914 to 1918 inclusive. In the volume published at the time of the International Financial Conference in Brussels, an attempt was made to show in summary tables the character of the increase in the note circulation of various countries during the period between the end of and 1919. Fuller details of this movement are given in Table III, pages 40-47. It is perhaps of greater importance now to consider the nature of the changes which have taken place during and more especially since 1920. In the following table, therefore, the note circulation at the end of each quarter of 1920 and 1921 is given as a percentage of the circulation at the end of the year 1919.
