

Evolution and animal life an elementary discussion of facts, processes, laws and theories relating to the life and evolution of animals

By David Starr Jordan

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 150 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: . . . understand just what part each one of the various developmental factors or causes plays, there is necessary a most thorough analytical study of development, and an attempt to determine in measurable or quantitative degree just what specific effects each factor produces. Obviously the most reliable way to effect this analysis and this determination of the specific cause and effect relations is to appeal to experiment. But biology has always been looked on as, and until recently has actually been, almost wholly a science of observation. It is now becoming, in part at least, a science of experiment as chemistry and physics have long been (these are now becoming more and more sciences of calculation, that is, exact sciences like mathematics), and this change and advance—for it is truly an advance when a science formerly relying for its facts on observation begins to base its...
